

Quality & Environmental Policy

We are dedicated to providing our customers with quality products and services at the lowest possible total life cost. We recognise that in conducting our business we can adversely affect the environment in which we and our neighbours live and we are committed to continually improve the impact we have on the environment and prevent pollution

This is achieved by abiding to a Quality & Environmental Management System meeting the requirements of ISO 9001, ISO 13485 and ISO 14001 and of working closely with our customers to ensure efficient processing of their products while minimising the impact on the environment.

Chemigraphic Ltd is determined to comply with the requirements of these standards and seek to continually improve the effectiveness of our system; to maintain a robust framework for establishing and reviewing quality and environmental objectives; and to comply with all relevant laws and regulations that relate to environmental aspects.

The Quality & Environmental policy is regularly reviewed and available to all parties upon request.

Chris Wootton, CEO
